Coronavirus (2019-nCoV) Briefing

Dear Exhibitors and Visitors,

All exhibitions planned for 2020 by Tüyap Group Companies will be held in foreseen dates. We would like to point out that the health and well-being of our exhibitors, visitors, employees, and all our business partners are always our priority.

For this reason; we closely monitor the developments of the novel coronavirus outbreak in Wuhan city, Hubei Province in mainland China, and follow all instructions of the World Health Organization (WHO) and the Republic of Turkey Ministry of Health.

We support the personal hygiene measures you take with the following practices in our venues:

- During this period, we pay extra attention to the cleaning of frequently touched surfaces and objects, such as doorknobs, batteries, handrails, toilets, and sinks. We provide disinfectants and sterilization materials for general use.
- We provide standard personal protection awareness training to all staff. i.e. personal hygiene, frequency of use of sanitation/disinfection products, etc...
- We advise all exhibitors and visitors no hand-shake policy.
- We install hygiene stations for your use in public areas.

As of now, there is no official announcement for any travel restrictions for March. Unless otherwise stated by Turkish authorities, we will host our exhibitors and visitors from outside of Hubei (Wuhan) and quarantine zones in mainland China.

As Tüyap Fairs Organization Group, we closely follow the developments on the subject.

We will be sharing our current action plan in line with the developments.

For more information, please follow the updates from local or national authorities on <https://www.who.int/> and <https://www.saglik.gov.tr/>

With our best regards,
